

## Check the Weather

Skills: Type a web address, follow links, use Back and Forward buttons

Materials: Internet access

Activity: Use the Internet to find out the weather forecast.

1. Type [www.weather.com](http://www.weather.com) into the address bar.
2. Type your zip code in the search box.

3. Click **Search**.

You will see today's weather.

# Check the Weather

You can also find out the weather tomorrow or for the next 10 days or the month.

The screenshot shows a weather website interface. At the top, there is a navigation bar with tabs for 'Yesterday', 'Today', 'Tomorrow', 'Radar Map', 'Hour-by-Hour', 'Weekend', '10-Day', and 'Month'. Below the navigation bar, there are links for 'Su tiempo en español', 'NCAA Football Weather', and 'Sky Watch'. The main content area is divided into two columns. The left column is titled 'Right Now for Milltown, NJ (08850)' and shows a 'Cloudy' icon, a temperature of '61°F', and 'Feels Like 61°F'. It also lists various weather metrics: UV Index (1 Low), Wind (From NE at 15 mph gusting to 21 mph), Humidity (89%), Pressure (29.90 in.), Dew Point (58°F), and Visibility (8.0 miles). The right column is titled 'Weather for your life' and features a 'Weather Related to...' dropdown menu. Below this, there is a promotional banner for 'GARMIN' with a smartphone icon and a 'REI GIFTS FOR EVERYONE' banner.

4. Use the Internet to find out the weather in another place. If you are not from NJ, look up the weather in the place you are from. Or, look up the weather in another state.

To find a zip code, go to:

<http://zip4.usps.com/zip4/welcome.jsp>

You can type in the address and find out the zip code (in the U.S. only).
